Operational Excellence Strategies in Oil, Gas & Petrochemicals

## WELCOME TO OPEX MENA 2018

It is now a given that striving towards Operational Excellence is critical for oil, gas and petrochemical operators as well as for the manufacturing and industrial sectors in general. Operators need to increase their margins and tightly control costs, whilst ensuring that safety and reliability are not compromised. Effective leadership is essential in managing the process of continuous improvement and ensuring that employees are empowered with data, information and procedures transparently in a role-based manner to assist in fast, accurate actions which lead to consistently good decisions.

Join us at **OPEX MENA 2018** where the major operators in the region will share case studies that outline their challenges, successes and key learnings. We will also hear from industry leaders, solutions providers and key consultants on the latest trends, tools and techniques that will drive us to even greater levels of operational excellence improvements, allowing companies to innovate in the areas of 'people', 'process', 'assets' and 'technology'.

**Solomon** invites you to join us at OPEX MENA 2018.

Organizations often consider maintenance as just a necessary cost, yet a focused and competent maintenance strategy delivers significant value by ensuring assets operate reliably and are available to produce product in accordance with business needs.

This seminar explains the fundamentals of Reliability and Maintenance, and uses information from Solomon's RAM Study to:

- Quantify the value of leading performance
- Demonstrate that performance improvement is possible
- Explain how performance improvement can be achieved by focusing on reliability, both at asset level and also in terms of organisational culture

The seminar uses information and insights from the RAM Study to explain some of the characteristics of leading organisations, thereby providing attendees with specifications they can implement to deliver performance improvement.

This seminar will be of direct benefit to operators of refinery and petrochemicals assets, and of particular relevance to manufacturing managers, and reliability and maintenance professionals

## WELCOME TO GSF 2018

It is widely recognised that organisations must develop their technical safety journey, focusing on their plant, safety, reliability and human interfaces in order to achieve the target of no surprises and zero accidents. A focus on safety is the number one priority for companies, with operators, manufacturers, suppliers and consultants developing innovative and effective solutions in these areas.

**The Gulf Safety Forum** again brings together international and local key industry experts from across the region to discuss strategies for continuous improvement of safety processes and procedures, as well as share successful case studies and roadmaps.

## GSF AWARD 2018

WEDNESDAY 28 MARCH

Euro Petroleum Consultants is pleased to announce the second edition of the GSF Safety Award.

Presented to the company that demonstrates the best overall achievement in HSE over the last two years, the GSF Safety Award will celebrate the company who has found innovative ways of making lasting improvements to the safety and health of their workers, to the environment and to productivity. By sharing their examples and recognising their achievements, the GSF Safety Award hopes to drive change and promote best practice in safety.

Judges will evaluate projects according to criteria such as management involvement, cultural evolution, performance improvement, innovation and stakeholder engagement.

## TRAINING COURSES

### Excellence in Process Safety Management

MONDAY 26 & TUESDAY 27 MARCH 08:30-16:30

#### TRAINER: PAUL HILL

This course will take the participants through the stages of process safety and environmental management in a straight forward and practical manner. Interspersed with practical examples and hands on application of the techniques required to successfully strengthen the process safety management in your organisations. From why unexpected events can develop out of control to how barriers can be implemented to halt the progress of the consequences. The sessions will cover a range of existing techniques to the latest approaches to integrating safety into the "mind" of the corporate cultures.

#### Benefits of Attending

- Understand 'what is process safety' and what are the key elements
- Understand the concept of leading and lagging process safety indicators
- Know and understand international standards and best practices
- Be able to identify and analyse process hazards
- Be able to identify and minimise risks associated with abnormal operations including start-up and shut-down
- Be able to categorise and investigate process safety incidents by severity

### Operational Excellence in Oil, Gas & Petrochemicals

WEDNESDAY 28 & THURSDAY 29 MARCH 08:30-16:30

#### TRAINER: PAUL RIJKS

In today's volatile business environment, organisations need to create competitive advantage in order to be successful. In the GCC, significant investments have been made in new plants which now must be run optimally in order to achieve world class performance. Organisations are now developing Operational Excellence strategies in order to maximise asset performance.

This course is designed to share the principles of Operational Excellence and to give practical strategies that can be applied in continuous process environments. The course will focus on both the people dimension of OE, together with practical ideas for implementation in oil, gas and petrochemical facilities.

#### Benefits of Attending

- Understand what is meant by Operational Excellence (OE)
- Understand why Continuous Improvement (CI) is essential for successful organisations
- Explore the 'people' dimension in OE. Why buy-in of staff is essential
- Monetise tested best practices of managing markets and customers, leading modern petrochemicals operations, organisations, projects and businesses
- Establish the improvement destination and develop the roadmap to reach it
- Understand the key tools that can be applied to drive OE in a process plant environment
- Be able to develop and drive improvement teams
- Develop an improvement plan for your organisation

#### HOW TO REGISTER

For attendance fees please refer to page 12. Registration can be completed online at [www.europetro.com](http://www.europetro.com) or send an email to [office@europetro-me.com](mailto:office@europetro-me.com)
