

Operational Excellence Strategies in Oil, Gas & Petrochemicals

in association with OPEX MENA 2018

28–29 March 2018, Crowne Plaza Bahrain

TRAINING COURSE

Understand and apply the principles and key elements of Operational Excellence to drive performance in process plants

In today's volatile business environment, organisations need to create competitive advantage in order to be successful. In the GCC, significant investments have been made in new plants which now must be run optimally in order to achieve world class performance. Organisations are now developing Operational Excellence strategies in order to maximise asset performance.

This course is designed to share the principles of Operational Excellence and to give practical strategies that can be applied in continuous process environments. The course will focus on both the people dimension of OE, together with practical ideas for implementation in oil, gas and petrochemical facilities.

Benefits of Attending

- Understand what is meant by Operational Excellence (OE)
- Understand why Continuous Improvement (CI) is essential for successful organisations
- Explore the 'people' dimension in OE. Why buy-in of staff is essential
- Monetise tested best practices of managing markets and customers, leading modern petrochemicals operations, organisations, projects and businesses
- Establish the improvement destination and develop the roadmap to reach it
- Understand the key tools that can be applied to drive OE in a process plant environment
- Be able to develop and drive improvement teams
- Develop an improvement plan for your organisation

Who Should Attend

The course is designed for manufacturing and technical personnel in oil, gas and petrochemicals:

- Operations Managers
- Maintenance Managers
- Production Engineers
- Process Engineers
- Reliability Engineers
- Shift Supervisors
- Operational Support Staff

This course will be of great interest to all personnel who drive Operational Excellence in their function

The course is presented in a highly participative format. The trainer will start with some basic principles, requiring interaction and discussion with the delegates. Actual case studies, discussions and interactive analyses will ensure that the course content is both engaging and interesting.

Registration & coffee will start at 8:00am on Day One. The course will run for two days, starting daily at 8:30am and finishing at 4:30pm. There will be two coffee breaks and a seated buffet lunch on each day.

FEES & DISCOUNTS

USD 2250

inclusive of trainer fees, training materials, completion certificate, lunch & refreshments

Group Discount:

20% discount for three (3) or more registrations from the same company

- OpEx Culture and Organisation
- Risk Management
- Change Management
- Benchmarking/OpEx Audit

Day 2

- Lean Thinking and Lean Tools
- Tools and Strategies
 - Lean Thinking
 - DMAIC
 - Six Sigma
 - Process mapping
 - RCM/TPM/FMEA
- Improvement Teams and Continuous Improvement
- Reflections, Next steps and Back at Work Action Plans

Meet Your Trainer: PAUL RIJKS

Paul Rijks is widely recognised for successfully guiding global safety, technical and operational strategy in the upstream, midstream and downstream sectors of the oil and gas industries to achieve capital and operational expenditure optimisation.

He possesses demonstrated talent for leading Operational Excellence management programmes related to Asset Integrity, Health, Safety, Security and Environment management.

He is an expert manager with extensive cross-cultural and international work exposure; able to forge solid relationships with partners and build consensus across critical stakeholder levels.

About the Organiser

Euro Petroleum Consultants [EPC] is an independent consulting group formed in London in 1996. EPC organises high-level conferences and training courses for the oil, gas and petrochemicals sector. Our in-depth knowledge of the industry combined with extensive technical and commercial experience enables us to guarantee that our training events are delivered to the very highest standards. The key to our success lies in the calibre of our trainers and our attention to detail.
